Professional Summary

IT Infrastructure & Network Security Engineer with 5+ years of experience designing, implementing, and managing enterprise IT infrastructure and network environments. Experienced in server deployment, virtualization using VMware ESXi and Microsoft Hyper-V, and firewall configuration including Forcepoint and pfSense to ensure secure and reliable systems. Skilled in managing network infrastructure using Mikrotik and switch configuration, as well as implementing monitoring solutions such as Grafana and Zabbix to improve infrastructure visibility and performance.

Technical Skills

Infrastructure & Virtualization

- VMware ESXi
- Microsoft Hyper-V
- Nutanix
- Server Deployment (Dell, HPE)
- RAID Configuration
- Hardware Installation (Racking, Mounting, Cabling)
- Remote Server Management (iDRAC, iLO)

Network & Security

- Network Infrastructure Management
- Switch Configuration (Dell, TP-Link, Ruijie)
- Firewall Configuration (Forcepoint, pfSense)
- Mikrotik Router Configuration (Routing, NAT, VPN, Failover, Load Balancing, QoS)
- VPN Configuration (Site-to-Site, Remote Access)
- Web Application Firewall (Safeline WAF)
- Network Topology Design

Operating Systems

- Linux Server
- Windows Server

Monitoring & Logging

- Grafana
- Zabbix
- Wazuh
- SigNoz

Work Experience

IT Infrastructure Engineer PT Mandala Teknologi Persada

September 2025 – present

- Designed and implemented IT infrastructure and network topology to support business operations.
- Deployed and configured physical servers including racking, mounting, and cabling in data center environments.

- Installed and managed virtualization platforms using VMware ESXi and Microsoft Hyper-V.
- Configured and maintained Forcepoint firewall including security policies, NAT, routing, and VPN configuration.
- Managed network infrastructure including switch configuration and Mikrotik routers.
- Configured and managed TP-Link Deco access points to support wireless network connectivity.
- Implemented infrastructure monitoring using Grafana, SigNoz and Wazuh.
- Contributed to the deployment of IT infrastructure supporting national law enforcement systems at Bareskrim POLRI (SOPS Division), including the Early Warning System (EWS) and Daily Operation Reporting System (DORS).

IT Infrastructure & Network Security Engineer

PT Caraka Komunika Indonesia

April 2023 – August 2025

- Installed and configured physical servers including mounting, cabling, RAID configuration, and iDRAC management.
- Implemented virtualization infrastructure using VMware ESXi, Hyper – V and managed Nutanix environment.
- Configured and maintained pfSense and Forcepoint firewalls including firewall rules, NAT, routing, and VPN configuration.
- Configured and managed wireless network infrastructure including Ruijie and Ubiquiti UniFi access points.
- Implemented Web Application Firewall (Safeline WAF) to enhance web application security.
- Built centralized infrastructure monitoring using Grafana and Zabbix to monitor servers, network devices, and services across production environments.
- Created and maintained infrastructure documentation including network topology, system configuration, and deployment procedures.
- Contributed to infrastructure deployment and support for national law enforcement systems within Pusiknas POLRI and Kejaksaan Tinggi DKI Jakarta

Network Engineer

PT Rekan Andalan Sukses

October 2022 – April 2023

- Configured and managed Mikrotik routers including routing, NAT, VPN, load balancing, and failover configuration.
- Managed network infrastructure including switch configuration to support internal network connectivity.
- Configured and managed Ubiquiti UniFi access points to support stable wireless network connectivity.

Education

Universitas Gunadarma	2015 – 2019
Bachelor's Degree in Information Technology	
GPA 3.36	
SMK Wikrama Bogor	2012 – 2015
Computer and Network Engineering (TKJ)	

Certifications

- Mikrotik Certified Network Associate (MTCNA) – Mikrotik
- Network Security Associate (NSE) – Fortinate
- CCNA Routing & Switching: Essentials
